

```
public class Coins {
    public static void main(String[] args) {
        int numcents = Integer.parseInt(args[0]);
        int quarters = numcents / 25;
        int remainderCents = numcents % 25;

        System.out.println(" please use " + quarters + " quarters
and " + remainderCents + " cents " );
    }
}
```
